

MEMORANDUM

TO: Interested Parties
FROM: Andrew Kays 
Executive Director
DATE: January 13, 2022
SUBJECT: Addendum No. 2 to RFP for On-Call Consulting, Engineering, Management and Construction Services, issued on November 23, 2021

Note that some questions were broken apart as indicated by [] for ease of responding, or have administrative clarifications.

.....
PROPOSALS ARE NOW DUE ONLY AS ELECTRONIC FILES TO procurement@nmwda.org, AND NO LATER THAN 4:00 PM LOCAL TIME ON FRIDAY, JANUARY 28, 2022. NO HARDCOPIES ARE REQUIRED. The pagination limit for the RFP response has not changed. Vendors should use professional judgement to present their proposals in a font that is legible in terms of type and size (for example Times New Roman, 10-size font, or Calibri, 11-size font).

Question 21: Section 1.6 SUBMISSION REQUIREMENTS (p. 4) -- Regarding delivery of the 4 hard copies: a. What delivery methods are accepted (US Mail, FedEx/UPS, Courier, In Person drop off?) b. Please confirm the delivery address(es) for each delivery type accepted.

Answer: Please see Addendum #1 dated January 4, 2022 answer to Question #18. There is now no hardcopy requirement for the proposal submission.

Question 22: Does the scope of work include 12-SW, 20-SW industrial permit support (SWPPPs, training, inspections)?

Answer: Yes, permit support as appropriate is part of the larger scope.

Question 23: Any chance you might hold a pre-bid meeting so us MBE firms can more easily find out who the prime firms would be?

Answer: The Authority will not be scheduling a pre-proposal meeting at this time, but is including a listing of the firms that have received RFP distributions. Please see the response to Question #9 of Addendum #1 dated January 4, 2022 for the current list of on-call contractors.

410.333.2730 / 410.333.2721 fax / authority@nmwda.org
nmwda.org / Business-to-Business Recycling: mdrecycles.org
Tower II – Suite 402, 100 S. Charles Street, Baltimore, MD 21201-2705

Comprehensive Waste Management Through Recycling, Reuse, Resource Recovery and Landfill

MEMBERS:
Rhody R. Holthaus, Anne Arundel County / Vacant, Baltimore City / D'Andrea L. Walker, Baltimore County / Jeffrey D. Castonguay, Carroll County
Phillip S. Harris, Frederick County / Joseph J. Siemek, Harford County / Mark A. DeLuca, Howard County / Guillermo Wainer, Montgomery County
Charles Glass, Maryland Environmental Service / Andrew Kays, Executive Director

Question 24: [T]he reference form it states "by email to procurement@nmwda.org by [insert date]". Should there be a date here or is it by Jan. 18 at 4pm?

Answer: *References must be received at procurement@nmwda.org no later than 4:00 PM on January 28, 2022.*

Question 25: Will we be notified as reference forms are received by the Authority?

Answer: *Offerors are responsible to confirm that the reference has transmitted the form to the Authority at procurement@nmwda.org. The Authority will be confirming receipt of the reference files to the person submitting the reference.*

Question 26: Regarding Attachment A-2, can you define what positions/titles are considered "key personnel"?

Answer: *Please refer to the RFP at Section 3.2 and Section 103 under the Service Agreement. Key Personnel are those team members that (1) the Offeror is using to present the qualifications for the RFP evaluation and (2) who will typically be assigned for Authority projects. As noted in the Service Contract, key personnel may be changed (with the prior written consent of the Authority), and the Offeror may include previously unlisted personnel for services in specific projects. Each approved Authority project is to be overseen by at least one of the Key Personnel presented in the Offeror's proposal.*

RFP at 3.2: 'Résumés of Key Individuals that would be assigned to assist the Authority must be included. Contractors must have one or more Maryland licensed Professional Engineers (in an appropriate field) on staff to perform design related services under the on-call contract.'

Draft Service Contract: 'Section 103. The individuals listed in Attachment A hereto are considered to be Key Personnel under this Contract, and will be made available by the Contractor upon the Authority's request to perform any tasks requested by the Authority under the Contract. The Contractor may not substitute any other personnel to perform the Authority's work without the prior written consent of the Authority.'

Question 27: [A] [Text emphasis and font color is from the requestor, font of the question has been conformed to that of the larger document] "I am writing to request an amendment to Section 109 of the form contract in your "Request for Proposals for Consulting, Engineering, Management and Construction Services" issued Nov. 23, 2021. In Section 109 of the form contract you state, "Contractors must have one or more Maryland licensed Professional Engineers (in an appropriate field) on staff to perform design related services under this Contract."

For consultants interested and qualified in programmatic consulting, engineering credentials are not necessary.

Therefore, this sentence, "Contractors must have one or more Maryland licensed Professional Engineers (in an appropriate field) on staff to perform design related services under this Contract." needs to be deleted, please. This requirement is inapplicable to consultants hired to recommend policies and

programs, and to provide education to member jurisdictions for services such as composting, PAYT, and "sustainable" and "green" practices, and to reach community goals like increasing waste diversion.

For example, for the service category of "**General Solid Waste, Planning and Recycling/Diversion Category (Sustainable Materials Management, Circular Economy, and Zero Waste)**" the following service criteria do not require engineering skills. The enumeration here is as found in the RFP:

1. Development and implementation of sustainable materials management, circular economy, and zero waste plans for municipalities to include at a minimum, community outreach experience; technical review of current systems, benchmarking/best practices including review of maintenance schedules and preparation of multi-year budgets for the implementation of the plans
2. Experience with plans that have been implemented and are demonstrably successful (e.g., data supported with clearly defined metrics in place)
3. Knowledge of regulations/legislation in other states/regions/countries
4. Extended producer responsibility and product stewardship planning/implementation, including experience with consumer, government, or manufacturer/retailer funded take back programs for materials such as mattresses, batteries, paint, electronics, furniture, and textiles
5. Extended producer responsibility and product stewardship policy experience (for example, drafting legislation or researching effects of legislation)
6. Experience with the development, management, and operations of pay-as-you-throw or other zero waste incentive programs for municipal and commercial waste
7. Experience in the conceptual design and engineering design of resource recovery parks and residential drop off centers for recoverable and recyclable/divertible materials. ("[conceptual design and engineering design of resource recovery parks](#)" amended to read, "[conceptual design of reuse & recycling recovery parks.](#)")
9. Experience with life cycle analysis, greenhouse gas emissions calculations, and carbon footprints used in system planning
10. Experience with cost/benefit analysis used for plan development
11. Waste generation and/or characterization studies (residential/commercial)
12. Diversion/Recycling program development/enhancement
14. Material Recycling Facility development, design and operations
15. Intermodal material transportation
16. Material collection, processing, and marketing

17. Electronics recycling management
18. Development of solid waste management plans, (including, but not limited to, solid waste management plan updates, recycling plan updates and other planning studies)
19. Development of disaster debris management plans for local governments
20. Public education, (including, but not limited to, the development of outreach materials and marketing strategies/studies)
21. Variable rate programs
23. Waste enterprise funds creation, management, and reporting
24. Construction and Demolition (C&D) reuse/recycling
25. Household Hazardous Waste (HHW) collection programs
27. Experience with state and federal grant rules and regulations

Of the 8 individual criteria for the "**Biosolids and Organics Management Service Category**," the following do not require engineering design. The enumeration here is as found in the RFP:

4. Marketing and distribution of biosolids finished product
5. Marketing and distribution of organics finished product, including compost and mulch
6. Collection systems for organics, including wet/dry, mixed waste, yard material only, food scraps only, yard material and food scraps combined, etc.
7. Knowledge of local, state and federal regulations

[B] For the criteria I deleted, a separate RFP for engineering design can be issued for the infrastructure to support the recommendations of a consultant qualified in "Sustainable Materials Management, Circular Economy, and Zero Waste," as well as "Biosolids, and Organics Management" design, policies, and programs.

The NMWDA has previously issued separate RFPs for related but separate services. For example, please see the attached NMWDA RFP for "Organics Processing Capacity" issued in 2014 to provide organics processing capacity for the NMWDA's member jurisdictions. This RFP required the proposers to include, "the costs of permitting, site lease, site preparation, construction, installation, testing, start-up, operations and maintenance and regulatory compliance." This RFP is an example of issuing a RFP for specific and distinct composting services. The same can be accomplished in the current RFP.

..."

[A] Answer: *The Authority offers the following clarification while noting that it will not change the requirements listed in the draft service contract as described in the request. There is no prohibition from a firm or team of qualified consultants without a P.E. to participate in the procurement for services. There will be, as noted in the requestor's submittal, the potential for services that do not require a P.E. The RFP at Section 1.1 states that a firm or team that would be tasked with the design related efforts (note, this does include evaluation of existing systems for the status of operations, as well as the design for repair, replacement, installation or removal) of a project generally under this category would require P.E. license in the appropriate discipline. The larger procurement has been changed to reflect consultants, and not just engineers, in part to broaden the potential expertise that the Member Jurisdictions can access under the on-call contracts.*

While many of the enumerated categories do not require a P.E. per se (e.g., the design of Variable rate programs), there are many wherein the engineering components for the category (e.g., Material Recycling Facility development, design and operations) will require specific engineering knowledge. With many consultants having Key Personnel holding certifications related to sustainable materials management, circular economy and zero waste, the Authority believes that the separation of requirements would dilute the potential benefits when compared to the incorporation of the requirements. Please see the responses to Questions #3 and #17 in Addendum #1 dated January 4, 2022 for additional clarification.

[B] Answer: *The current suite of on-call contracts is going to end on June 30, 2022 and needs to be replaced at this time. The intent of the procurement is to allow for the greatest flexibility possible in the formation of potential consulting teams, while meeting the tactical and strategic needs of the Authority's Member Jurisdictions. As noted by the requestor, the Authority has the ability to offer narrowly defined scope RFPs at the request of the Member Jurisdictions. As noted in [A] above though, the Authority believes that the flexibility of the contract, as well as the incorporation of the requirement for the qualifications in sustainable materials management, circular economy and zero waste frameworks will push for advances in design in an organic manner, instead of siloed efforts. Finally, at Section 1.1 of the RFP, the Authority states "[t]o be deemed qualified and to contract with the Authority, the firm does not have to be qualified in all of the categories or all of the tasks in a particular category."*

Question 28: The RFP states in Section 3.2...

The Offeror must also provide Statements of Non-Segregated Facilities, Drug Free Workplace Policy, current Maryland State Department of Assessments and Taxation (MDSDAT) Certificates for all firms in the proposal. If the Offeror does not currently have the required Statements and Certificates, the Offeror must provide a signed letter in the proposal indicating the Offeror will obtain and provide the necessary Statements and Certificates prior to the signing of the Contract. The Authority will not sign a Contract with a selected Offeror until the required Statements and Certificates are received.

[A] Would my subconsultant, who is based in Ohio need to register with the state of Maryland's Department of Assessments and Taxation?

[A] Answer: *For the proposal, the sub-consultant may provide evidence of taxation standing for the jurisdiction in which it is located. Typically, this is a certificate available from the state of incorporation. Note that for actual work performed in the State of Maryland, all out-of-state entities*

should consult the requirements set forth by Maryland's Department of Assessments and Taxation to conduct business in the State of Maryland.

Question 29: Does "General format guidelines for presentation of key projects" mean that the offeror project descriptions can be drafted in a format with which the contractor is comfortable (e.g., Word Doc), as long as the information on Attachment C-1 is present?

Answer: *Please see the response to question 10 in Addendum#1 dated January 4, 2022.*

Question 30: Are sitework contractors required as a part of the Proposal or will the Authority be looking to award an on-call directly to a site contractor? This question is raised as prior RFPs for this work noted "consultant" not "contractor" as was done on this years' on-call RFP.

Answer: *The larger procurement has been changed to reflect 'consultants', and not just 'engineer's, in part to broaden the potential expertise that the Member Jurisdictions can access under the on-call contracts. The Service Contract will allow for contracted firms to bring onboard subcontracting firms capable of site work within the terms and conditions of the Service Contract.*

Question 31: By what date do the references need to be returned to the Authority? No date is stated on the form or in the RFP.

Answer: *References must be received at procurement@nmwda.org no later than 4 PM on January 28, 2022.*

Question 32: On page 11, it states:

[A] The Offeror must also provide Statements of Non-Segregated Facilities, Drug Free Workplace Policy, current Maryland State Department of Assessments and Taxation (MDS DAT) Certificates for all firms in the proposal. Since these forms are not included in the RFP document, is it acceptable to submit a company-letterhead, signed document noting compliance with these requirements and the supporting MDS DAT certificate, or are there specific forms that the NMWDA is requiring be completed?

[B] Also, since it states "all firms," does that mean that the subconsultants have to complete them too, and provide MDS DAT certificate?

[A] Answer: *The Statements of Non-Segregated Facilities and Drug Free Workplace Policy submittals can be the written policy of the firm. There is not a standard form for this procurement.*

[B] Answer: *In terms of the MDSTAT requirement, please see the response to question #28.*
